# Maternal MAT Directory

## Click-able Directory Feature

---

AHCCCS covered services are available by commonly utilized services types. Each service type has a breakdown of counties that serve B – UFC/B – UCA members. Providers that offer the known AHCCCS covered service are in blue letters. Clicking on the name will take you to the agency and referral contact. This is also available for each provider listed in the table of contents.

Agencies listed in this directory are contracted with B – UFC, this may not reflect all behavioral health providers. For additional General Mental Health/ Substance Use providers, please refer to <https://www.BannerUFC.com/ACC> provider look-up.

For more information on fidelity to ART practice, refer to the AHCCCS Adult Recovery Team or (Adult Clinical Team: <https://www.azahcccs.gov>

## General Information

---

### Medication-Assisted Treatment (MAT)

Medication-assisted treatment (MAT), including opioid treatment programs (OTPs), combines behavioral therapy and medications to treat substance use disorders.

The Substance Use Disorder Prevention that Promotes Opioid Recovery and Treatment for Patients and Communities (SUPPORT) Act affords practitioners greater flexibility in the provision of medication-assisted treatment (MAT).

### Opioids Treatment Program

An OTP is any treatment program certified by the Substance Abuse and Mental Health Services Administration (SAMHSA) to provide medication-assisted treatment for individuals who are diagnosed with opioid use disorder. These treatment programs are authorized to administer and distribute all forms of medication assisted treatment, Methadone, Buprenorphine (Suboxone/Subutex) and Naltrexone. Additional services within the OTP can include case management, peer support, individual counseling, group counseling and other types of support services for the individual. AHCCCS is implementing new standards and reporting requirements for all Opioid Treatment Programs (OTPs) receiving Medicaid reimbursement.

### Office Based Opioid Treatment Programs

OBOT programs allow for qualified primary care physicians to provide opioid treatment services in their office-based settings. Federal guidelines allow qualified physicians in the OBOT to prescribe medications for opioid use disorder in their office setting, but it is required that the physician has the ability to connect their patients to the appropriate level of counseling and other appropriate support services

## Crisis Support

---

A Crisis is when a person presents with a sudden, unanticipated, or potentially dangerous behavioral health condition, episode, or behavior. Crisis intervention services are provided to a person for the purpose of stabilizing or preventing a sudden, unanticipated, or potentially dangerous behavioral health condition, episode, or behavior. Crisis intervention services are provided in a variety of settings or over the telephone. These intensive and time limited services may include screening, (i.e. triage and arranging for the provision of additional crisis services) counseling to stabilize the situation, medication stabilization and monitoring, observation and/or follow-up to ensure stabilization, and/or other therapeutic and supportive services to prevent, reduce or eliminate a crisis situation.

### Crisis Response Network (CRN) Crisis Line:

**(602) 222-9444 or (800) 631-1314**

(Gila County, Maricopa County, Pinal County)

### Nurse Wise Crisis Line:

**(520) 622-6000 or (866) 495-6735**

(Cochise County, Graham County, Greenlee County, La Paz County, Pima County, Santa Cruz County, Yuma County)

## AHCCCS COVERED SERVICES

---

### Medication Assisted Treatment (MAT) for Substance Abuse Disorders (suds)

Medication-Assisted Treatment (MAT) is the use of medications, in combination with counseling and behavioral therapies, to provide a “whole-patient” approach to the treatment of substance use disorders and prevent opioid overdose. A combination of medication and therapy can successfully treat these disorders, and for some people struggling with addiction, MAT can help sustain recovery.
